Claims

- Ball-point pen (1, 11) comprising a reservoir (2) communicating with a hole (10) connected to a capillary channel (3) of a tip (4) which is provided with a cavity (9) which seats the ball (5) for writing, 5 this ball (5) being kept pressed against a retaining edge (9t) of the abovementioned cavity (9) as a result of the thrust of a compression-resilient spring (6) terminating in a straight portion (6r) which is aligned with the longitudinal axis (N-N) of the ball-point pen 10 (1) and the free end (6p) of which is in contact with the said ball (5), characterized in that said capillary channel (3) has, inside it, means (7, 7') which, coming into contact with the said straight portion (6r) of the spring (6), prevent it from becoming inclined with 15 respect to the said longitudinal axis (N-N) of the ball-point pen (1).
- to Claim 1, Ball-point pen according characterized in that the said capillary channel has a narrow section (7, 7') which, being passed 20 through in the axial direction by the said straight portion (6r) of the spring (6), is designed with dimensions such as to contain said portion in complementary manner with a minimum approximately of play, substantially preventing it 25 amount from inclined positions with respect to assuming abovementioned longitudinal axis (N-N).
 - 3. Ball-point pen according to Claim 2, in which one or more through-grooves (8i) are formed in the region of the said narrow section (7), said through-grooves connecting the cavity (9) inside which the said ball is seated to the hole (10) with which the said reservoir (2) communicates.

30

- 4. Ball-point pen according to either one of 35 Claims 2 or 3, in which the said narrow section is formed by a cylindrical shaped restriction (7).
 - 5. Ball-point pen according to either one of Claims 2 or 3, in which the said narrow section is defined by a ring (12) with a semi-circular cross

section projecting towards the inside of the capillary channel (3) having its axis coinciding with the longitudinal axis (N-N) of the ball-point pen (1).
